- Internal and external audit

INDIA FOOT PRINT

Industry Solution - Cold Chain Solutions: Pharmaceuticals

- Compliant to Healthcare Industry Standards
- Tailor solutions to your unique handling and transportation requirements
- Temperature Controlled Facilities (15°C to 25°C; 2°C to 8°C ;and -20°C)

Pharmaceutical Ethics

- Specialized service for prescription drugs.
- Assumption that everyone is equally susceptible to temptation and theft

Bio-Technology Products

- Proteins are subject to Denaturation in vaccines.
- Storage temperature plays a very vital role in transportation of vaccines

Generic Pharma

- GDP Certified
- Batch Control
- FEFO Management
- Recall & Return Management
- Waste Management

Medical Devices

- Serial Number Tracking
- Demo Machine Handling

Diagnostics

- Maintenance of Cold Chain
- Proper packing and Distribution

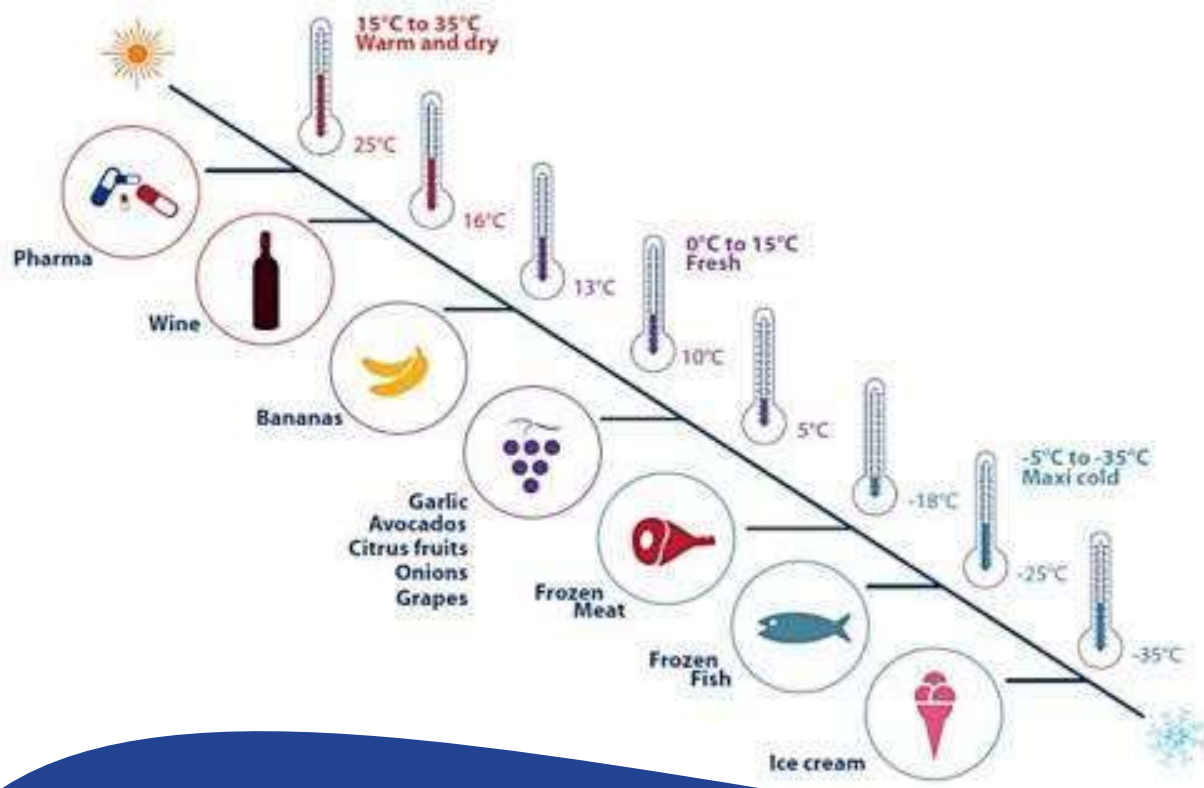

Health Kits

- Kitting for campaigns, natural disasters and war torn areas

Industry Solution: Perishables & Sea Food

Transport of perishable items like meat, produce, poultry, seafood & dairy products. Our temperature controlled transport options will give modern businesses the flexibility and confidence to develop global supply chains for temperature sensitive goods.

-  Service Temp range from -30°C to +30 °C
-  Dehumidification range from 65% to 95% maximum relative humidity
-  High-tech chlorofluorocarbon (CFC) free insulation ensures minimum heat leakage
-  Operating settings 360-500 Volts & 60 Hertz
-  Adjustable fresh air exchange from 0 to 285 cbm/hr, special T bar floor for increased circulation
-  Temperature control through built-in micro processor
-  High quality cooling machinery
-  Use of environment friendly reagents

Supply Procurement

- Pre-cooling systems
- Farms & markets
- Manufacturers

Transport

- Refrigerated Trucks
- Refrigerated Railway wagon
- Refrigerated Cargo Containers

Storage

- Cold Storage
- Warehouse

End Customer

- Retail, Terminals, Markets, Factory, Ports & Airports

Elitelogix Digital Platform

Digital technologies transform every industry they touch. Freight is no exception. And while the past decade has seen unprecedented advancements in software, connected hardware, and mobile technologies, it's just a preview of what's to come. The true digital boom has yet to hit the freight industry — but it's quickly coming, driven by a well-known catalyst: high costs.

Elitelogix is on a revolutionary path of digitally engineering logistics by leveraging the platformization potential in the freight forwarding industry over the recent years.

Elitelogix is logistic intelligent purpose built cloud software and data analytics platform used by freight brokers, 3PLs, shippers, and intermodal users. Its seamless automation helps reduce the margin of error in freight businesses by creating organizational defined procedures to be followed by all users. Elitelogix will reduce the need for manual interactions, redundant copies of data and any associated synchronization, with the application of algorithms, AI and machine-learning, it can further support operational, tactical and strategic decision-making, including smart capacity optimization and improved supply chain management and visibility.

We are living a determinant moment in the industry, as we await for an impactful **digital transformation** which can either make or break you. It's then vital for freight forwarders and other logistics players to hurry up and embrace new technologies to be able to position themselves at the forefront of the market's competition.

WHY CHOOSE ELITELOGIX. ?

Global Solution

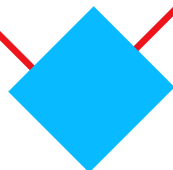

- Strategic Solutions
- Global Presence with Local Expertise
- Enables the Management of Complex Supply Chain Solutions
- Continuous Enhancement and Upgrades

Seamless Integration

- Proven integration with customer and other operational systems
- Reliable, scalable, and cost effective solution
- End to end track and trace visibility
